

Total granulate consumption and kWh required per kg of plastic from 2012 to 2024

Total Energy consumption and Total CO2 Emissions from 2012 to 2024

*) Electricity procurement from 100 % renewable energy sources

**) Diesel: 9,8 kWh/Litre; Petrol: 8,5 kWh/Litre; Propane: 14 kWh/kg

CO2 Emissions in kilograms per kilogram of plastic from 2012 to 2024

*) All electricity procurement is sourced from 100% renewable energy sources, with 84,62% obtained externally and 15,38% generated through own production (PV)

Total Electricity consumption and CO2 Emissions from 2012 to 2024

*) All electricity procurement is sourced from 100% renewable energy sources, with 84,62% obtained externally and 15,38% generated through own production (PV)

Natural Gas consumption and CO2 Emissions from 2012 to 2024

Fuel consumption and CO2 Emissions from 2012 to 2024

**) Diesel: 9,8 kWh/Litre; Petrol: 8,5 kWh/Litre

Propane consumption and CO2 Emissions from 2012 to 2024

**) Propane: 14 kWh/kg

Water consumption and Wastewater from 2012 to 2024

Efficiency of water use: litres per kilogram of plastic from 2012 to 2024

Amounts of Waste and Waste Rate from 2012 to 2024
